

Job opportunity

Are you looking for an interesting, flexible and meaningful job supporting a research group?

Are you studying Psychology, Latvian language and literature, Philology, or have an excellent command of Latvian and experience in (quantitative) research methods?

Are you interested in working in a multi-disciplinary team researching user experience and interface design at the Faculty of Computing?

Then don't hesitate and apply! There are two positions open.

Your tasks

Code and score qualitative data from an experiment (score answers to questions according to a provided scoring scheme)

Data input and data management

Possibility to learn about and contribute to data analysis, depending on candidate's skills

Requirements

Excellent command of Latvian (mother tongue)

Good command of English (level B2)

Good command of Microsoft Word and Excel

Experience with quantitative and qualitative research methods – welcome but not obligatory

Salary: 9€/hour, on fee note basis – approximately 15 hours (possibility of extension)

Please send you CV and a cover letter (introducing yourself and your motivation for this project in 5-6 sentences) to Aisha Futura Tüchler aisha.tuechler@lu.lv

Looking forward to receiving your application!
